

Architecture

Structural exteriors and interiors

Architectural reporting - I provide technical and creative images, mostly for print / web media. Where possible, locations are assessed prior to the shoot to determine the best advantage for the structure or interior. A strong understanding and the ability to “play with light” provides interesting moods & character to the outcome of my work. When planning your shoot, factor in an early morning and/or late afternoon dusk session.

Low angle oblique aerial photography (helicopter) rates are available on request.
